

## Product Application Presentation

**Product Identifier:**

# TCI 122 H.D.

**Process Identifier:**

**Virgin laquer thinner paint gun & feed line, ink & adhesive cleaning solvent**

### Product Presentation

TCI 122 H.D. is a high purity laquer thinner paint gun and feed line cleaning solvent. It is a thin clear liquid derived from a *virgin stock* of high purity ingredients. It's a powerful alternative as a user friendly solution to olfactory repulsive products. TCI 122 H.D. is non-conductive and non-corrosive (no ionization), thus does not promote flash rusting.

It has a flash point of  $-20^{\circ}\text{C}$ .

### Solution Disposal

According to the Ontario Ministry of the Environment and Energy "Regulation 347" and local municipal by-laws, the cleaning process has generated a liquid industrial waste.

The spent waste solvent and sludge is removed from the parts washer systems by Tetra-Chem Industries Ltd. on delivery of fresh product.

**Ontario Certificate of approval:  
A 800506.**

### Automatic & manual paint gun cleaner

UNI-RAM Recycling Technology

**Packaging:**  
020 L Code: 122-020  
205 L Code: 122-205

All Surfaces – Film Free

### Process Introduction

TCI 122 H.D. is an innovative new liquid multi-purpose cleaning product designed to meet today's progressive maintenance needs. It is ideal for all applications where stricter environmental pollution standards and stringent health and safety criteria require a product that is safe. It is designed to remove uncured paints from any metal, plastic, rubber and ceramic surfaces with minimal agitation.

### Process Specificity

TCI 122 H.D. is used at full strength. It is designed for industrial and commercial related maintenance facilities. It is versatile and economical. It is ideal for the UNI-RAM Recycling Technology Unit recirculating solvent parts washer (see product application insert). Use TCI 122 H.D. only in manufacturer's approved cleaning systems.

The superior quality ingredients give instant cleaning performance with solution longevity.

If your company generates contaminated solvents, then the **UNI-RAM URS1600SS** solvent recycler is for you. No matter the solvent, from acetones to white petroleum spirits, contaminated solvents will be recycled to their original form as if you had purchased new solvent. Since all **UNI-RAM** solvent recyclers are explosion proof (Class I Division I Group D), flammable solvents are no problem.

Washing tools, spray guns and parts with solvent used to generate volumes of dirty solvents. This dirty solvent is picked up by a hazardous waste recycler who more often than not would sell you back new solvent which was refined from your own waste stream as well as other generators (containing possible carcinogenic components—NOT extractable by distillation).

**Benefit** from recycling your own waste stream in an integrated tools, spray gun and parts washer. The **UNI-RAM COMBO** model combines both, a professional washing station with a solvent recycling system. Simple to operate and fully automatic, this unit will permit you to work with clean solvent all the time without the need to continuously buying more solvent. Save money on solvent purchase and minimize your waste solvent stream. Self-directed compliance with regulations enhances your corporate image.

Please call our technical support line at **1-888-658-5515** for solutions to your industry.

**For industrial and institutional use only.**
