

Product Application Presentation

Product Identifier:

TCI 206 H.D.

Process Identifier:

Asphalt roller & Dump truck bed surface bitumen repellent and anti-static solvent based fluid RTU

Product Presentation

TCI 206 H.D. features an effective green solvent based formulation concept without petroleum solvents in the form of a super concentrated liquid that combines biodegradable features, environmentally friendly asphalt slip and anti stick features meeting current Ministry of Transportation specifications.

The ready to use concentration strength is based on environmental conditions of temperature and humidity encountered in the asphalt handling and paving industry.

Safe on all common surfaces when used according to directions.

Packaging: 205 L 1,000 L

Process Introduction

TCI 206 H.D. is designed for spray applications.

TCI 206 H.D. is ideal for generating clinging spray to blanket walls, floors and tailgates of truck beds to prevent adhesion of asphalt aggregate without adverse effects.

TCI 206 H.D. is ideal as a spray for asphalt rollers to assure trouble free compression of the asphalt aggregate while paving without adverse effects.

The chemical solution is thus harmless to aluminum articles and paint over time.

Process Specificity

TCI 206 H.D. is used as is and applied manually as a spray or with the recommended chemical applicator system depending on number of pieces of equipment and available time. See Picture.

Harmless to asphalt - solvent free with EXCELLENT release properties when used according to directions.

Product Safety

Read safety data sheets before using any chemical product.

STORAGE:

Store container @ (4 - 45 °C)

For industrial and institutional use only.
