APPLICATION TECHNOLOGY

INNOVATIVE ENGINEERING

Product Application Presentation

Product Identifier:

TCI 701-50 H.D.

Process Identifier:

Multi-purpose aqueous cleaner/degreaser ready-to-use cold temp application formula (-20°C)

Product Presentation

TCI 701-50 H.D. features a new *hydro-carbon soot solvent* in the dilute form of a super concentrated *green* liquid formulation that combines the cleaning ability of biodegradable detergents, environmentally friendly sequestering agents and mildly buffered alkalis. Designed with *phosphate free* chemistry. The concentration strength is based on the degree of soil complexity most often encountered in the maintenance industry at ambient temperatures. Safe on all common surfaces when used according to directions.

Packaging: 4, 20, 205 litres

Process Introduction

TCI 701-50 H.D. is designed for exterior and interior washing when applied with the manufacturer's approved chemical applicator manifold system (see brochure) and sprayed as a light mist directly from the mixing tank onto the surface to be cleaned. The preportioned solution breaks the soil matrix quickly without brushing or when agitated with a brush and rinsed with warm or cold water.

TCI 701-50 H.D. is ideal for removing heavy deposits of incomplete combustion by-products from diesel and gasoline exhaust ports, hydraulic oils, atmospheric contamination of water soluble coolants on surfaces of machinery, road film on paint or vinyl, bugs, engine oil and grease. The chemical solution rinses freely and is thus harmless to paint over time. This formulation improves light reflectivity by leaving a rich sheen behind.

Process Specificity

This prescribed concentration is fast, efficient and versatile for all cleaning jobs. The process can be implemented for the exterior cleaning of all types of painted surfaces, vinyl tarps & awnings, chrome, ferrous and non-ferrous metals (steel and copper), white metals (aluminum and magnesium) where daily or weekly maintenance will not tarnish or dull wheels, fuel tanks, bodies, stainless steel or truck accessories. For interior cleaning it can be used to damp mop floors, degrease floors, walls and ceilings, strip wax, saponify restaurant or kitchen cooking oils & greases, interior passenger vehicle grooming on vinyl, cloth, carpets and plastics. Rinse all surfaces with a damp rag.

For industrial and institutional use only.
