SPECIALTY CHEMISTRY

WASTE MANAGEMENT

APPLICATION TECHNOLOGY

INNOVATIVE ENGINEERING

## Product Application Presentation

Product Identifier:

# TCI 703 H.D.

Process Identifier:

## Multi-purpose aqueous cleaner/degreaser liquid concentrate

### Product Presentation

TCI 703 H.D. features a water and oil soluble *solvent* in a super concentrated *green* liquid formulation that combines the cleaning ability of biodegradable detergents, environmentally friendly sequestering agents with buffered alkalis and the intrinsic protection of corrosion inhibitors

Designed with *phosphate free* chemistry.

The ready to use concentration strength is based on the degree of soil complexity most often encountered in the maintenance industry at ambient temperatures.

Safe on all common surfaces when used according to directions. This formulation can also be supplied in the ready to use form with deionized water for convenience and superior performance.

### Packaging: (see thru HDPE)

**4 x 4 L case**  
**20 L carboy**  
**205 L drum**  
**1,000 L tote**

### Process Introduction

TCI 703 H.D. is designed for exterior and interior washing when applied with the manufacturer's approved chemical proportioner and applicator system (see brochure) for large jobs and sprayed as a light mist directly from the mixing tank or spray bottle onto the surface to be cleaned. The pre-proportioned solution breaks the soil matrix quickly without brushing or when agitated with a brush and rinsed with warm or cold water.

TCI 703 H.D. is ideal for removing heavy deposits of incomplete combustion by-products from diesel and gasoline exhaust ports, hydraulic oils, atmospheric contamination of water soluble coolants on surfaces of machinery, road film on trucks, paint or vinyl, engine oil and grease.

The chemical solution rinses freely and is thus harmless to paint over time.

This formulation improves light reflectivity by leaving a rich sheen behind.

### Process Specificity

The prescribed ready to use concentration is fast, efficient and versatile for all cleaning jobs. The process can be implemented for the exterior and interior cleaning of all types of painted surfaces, vinyl tarps & awnings, chrome, ferrous and non-ferrous metals (steel and copper), white metals (aluminum and magnesium) where daily or weekly maintenance will not tarnish or dull wheels, fuel tanks, bodies, stainless steel or truck accessories.

For interior cleaning it can be used to damp mop floors daily, degrease floors, walls and ceilings, strip wax, saponify restaurant or kitchen cooking oils & greases, interior passenger vehicle grooming on vinyl, cloth, carpets and plastics.

Rinse all surfaces with a damp rag in the spray and wipe applications.

For industrial and institutional use only.
