Product Application Presentation

Product Identifier:

TCI 712-50 H.D.

Process Identifier:

Greasy automotive garage bay concrete floor cleaner - ready to use - prespray

Product Presentation

TCI 712-50 H.D. is a green liquid with an environmentally friendly grease and grime cutting solvents. This formula is a blend of alkaline builders with buffers, low-foaming and biodegradable detergents, chelating agents and corrosion inhibitors.

Cleaning strength requirements are adjusted with cold water to suit the soil matrix complexity. Safe on all water safe surfaces when used according to directions.

Process Presentation

TCI 712-50 H.D. is designed for automotive garage floor washing when applied with the manufacturer's approved stationary or mobile chemical applicator system and sprayed as a light mist directly from the mixing tank onto the surface to be cleaned. The preportioned solution breaks the soil matrix quickly which is then affected by garden hose pressure or (2000-3000 psi) cold water rinse.

TCI 712-50 H.D. is ideal for removing heavy encrustation of mud, bug splatter, excreta and road film with ease, lime dust & oxides from all surfaces sensitive to acid type cleaning solutions, automotive exhaust soot, oil, grease including grime. The chemical solution rinses freely and is thus harmless to cold aluminum articles and paint over time. This formulation improves light reflectivity by leaving a rich luxurious sheen behind.

No white residues

Process Specificity

TCI 712-50 H.D. concentrate may be used as is or mixed with water to suit the application either manually or with the recommended chemical proportioner depending on soil complexity and accumulated build-up.

The process can be implemented for cleaning-in-place all types of painted surfaces, chrome, ferrous and non-ferrous metals (steel and copper), white metals (cold surface aluminum and magnesium) where daily or weekly maintenance will not tarnish or dull wheels, fuel tanks, bodies, stainless steel or truck accessories. Enormous time and labor savings are realized when the surface is rinsed with cold soft to medium hard water.

Product Safety

According to government regulations read safety data sheets before using any chemical product. Contains mild alkalies and biodegradable surfactants. Do not take internally. If splashed on skin, flush thoroughly with water. Avoid prolonged skin contact with concentrate. If splashed in eyes, flush thoroughly with water. If irritation persists seek medical attention. Keep out of reach of children. **For industrial and institutional use only.**

Packaging: 020, 205, 1000 L

For industrial and institutional use only.
