Product Application Presentation

Product Identifier:

TCI 715 H.D.

Process Identifier: New concept cleaning power. Safe on all surfaces. Brushable, high-suds, cold process road film remover producing a high gloss shine without wax

Product Presentation

TCI 715 H.D. is a blend of powerful biodegradable detergents precisely formulated to attack and release the soil structure on surfaces encountered in the transportation industry. Through a patented process the active ingredients are super concentrated. Reconstitution with water is done on site.

TCI 715 H.D. features personal and environmental safety, compact storage, economical and energy saving transportation. It can handle all the daily cleaning requirements even with hard water conditions when used according to directions. The chemical solution rinses freely and is thus harmless to paint over time. This formulation improves light reflectivity by leaving a rich luxurious sheen behind that is not a wax deposit, thus no vision impairment.

Process Introduction

TCI 715 H.D. is proportionally metered directly from the shipping container into the pre-spray stage of the bus wash system. No flammability risk. By performing a simple test determine the desired dilution strength. (100:1-1000:1). Product consumption is thus reduced to the absolute minimum requirement.

Due to its high sudsing nature, it provides excellent lubricity to the bristles of the brushes when agitating on the surfaces. Enormous water savings are realized when the surface is finally rinsed with cold water since there is no residual alkalinity to be flushed off.

Process Specificity

The process can be implemented for cleaning all types of painted surfaces, chrome, ferrous and non-ferrous metals, aluminum (daily or weekly maintenance will not tarnish or dull wheels, fuel tanks or bodies), stainless steel, including all truck, car and bus accessories. The cleaning can be performed outside or in a wash bay without risk to property, personal and the environment. No corrosive or detrimental effects. The finished product will be streak free, spotless and protected by an electrostatic neutral film that improves reflectivity of light.

Product Safety

According to government regulations (WHMIS 2015) Read safety data sheets before using any chemical product. Contains mild alkalies and biodegradable surfactants. Do not take internally. If splashed on skin, flush thoroughly with water. Avoid prolonged skin contact. If splashed in eyes, flush thoroughly with water.

Packaging: 20, 205, 1000 Litres

For industrial and institutional use only.
