**CHEMICAL NAME**  
Hydrogen peroxide

**CAS NUMBER**  
7722-84-1

**CONCENTRATION [%]**

## Section 4: First aid measures

### Description of First Aid Measures

**General:** Determine areas of exposure.

**Inhalation:** Excessive exposure - move the fresh air.

**Skin Contact:** Wash with cold water.

**Eye Contact:** Remove contact lenses. Rinse with cold water or saline solution.

**Ingestion:** If conscious, give 2 glasses of water. Get immediate medical attention. Do not induce vomiting.

### Most Important Symptoms and Effects Both Acute and Delayed

**General:** Low risk to adverse health effects.

**Inhalation:** Inhalation may cause coughing, choking, irritation (possibly severe) chemical burns, shortness of

breath, and pulmonary oedema. Pulmonary oedema may develop several hours after a severe acute exposure.

**Skin Contact:** Skin irritation or burns.

**Eye Contact:** Eye exposures may cause burns to the eye lids, conjunctivitis, corneal oedema, and corneal burns. Careful ophthalmologic evaluation is recommended and the possibility of local corticosteroid therapy should be considered.

**Ingestion:** Undiluted, there is a likelihood of corrosive effects on the gastrointestinal tract after ingestion, and the unlikelihood of systemic effects, attempts at evacuating the stomach via emesis induction or gastric lavage should be avoided. There is a remote possibility, however, that a nasogastric or orogastric tube may be required for the reduction of severe distension due to gas formation.

## Section 5: Fire-fighting measures

### Extinguishing Media

**Suitable Extinguishing Media:** Water only.

**Unsuitable Extinguishing Media:** All others.

### Special Hazards Arising From the Substance or Mixture

**Fire Hazard:** Corrosive vapours at high temperatures.

**Explosion Hazard:** No risk.

**Reactivity:** No risk.

### Advice for Firefighters

**Precautionary Measures Fire:** In closed unventilated containers, risk of rupture due to the increased pressure from decomposition of Hydrogen Peroxide. Contact with combustible material may cause fire.

**Firefighting Instructions:** On decomposition product releases oxygen which may intensify fire.

**Protection During Firefighting:** Use water spray to cool fire exposed surfaces and protect personnel. Move containers from fire area if you can do it without risk. As in any fire, wear self-contained breathing apparatus and full protective gear

**Hazardous Combustion Products:** Oxygen gas.

## Section 6: Accidental release measures

### Personal Precautions, Protective Equipment and Emergency Procedures

**General Measures:** Wear impervious splash protection. Neutralize with copious amounts of water.

### For Non-Emergency Personnel

**Protective Equipment:** Wear impervious splash protection.

**Emergency Procedures:** Mop up small spills with water and flush to sanitary sewers. Large spills should be contained and reported immediately.

**Phone Number of your local authority for Emergency Spill Response:**

### For Emergency Personnel

**Protective Equipment:** Wear impervious splash protection.

**Emergency Procedures:** Neutralize with copious amounts of water.

### Environmental Precautions

**Methods and Material for Containment and Cleaning Up**

**For Containment:** Plastic.

**Methods for Cleaning Up:** Mop up small spills and dispose to sanitary sewer.

## Section 7: Handling and storage

### Precautions for Safe Handling

**Additional Hazards When Processed:** Use only Manufacturer supplied storage and/or dispensing equipment. See GHS WORKPLACE LABEL in your work area.

**Hygiene Measures:** Do not eat, drink or smoke while using this product.

**Personal Protection Equipment required for cleaning process.**

**Storage Conditions:** Keep only in original containers.

**Incompatible Materials:** Do not mix with other cleaners.

**Special Rules on Packaging:** Consult Manufacturer or Supplier.

**Specific End Use(s)** TCI 602 H.D. FOOD GRADE ANIMAL DRINKING WATER ACIDIFIER for SCALE and ALGAE PREVENTION is intended to prevent scale blockage and algae growth in water feeders at a pH of 6.5 and Hydrogen Peroxide at 10ppm to promote good health in growing poultry birds.
